

SCHANCOVER

– Covering af liquid manure tanks

A SCHANCOVER-covering is a solution to minimize the escape of gas.

The cover is supportet with a stainless steel mast, on which there are stretching cords to the outside of the tank. This construction makes it possible for upkeep of both the cover and the inside of the tank, Because the cover at anytime can be pulled back – without any contact to the liquid manure, and without lossen the steel mast. Fore protection of the cover there are in the circumference mounted a strong band in PVC.

SCHANCOVER-gives You a added productive capacity, improved the manure value and further more, it can be used to accumulate of Biogas, that are produced when the liquid manure is brewing.

Less ammonia evaporation and less obnoxious smells is a result beneficial for considerations.

The Cover is resting on cords, these cords is fasten on the tank with a special developed hardware.

*On our HomePage You can Download a information form.
Fill in the form and send it to us, then we will make a non-committal offer.*

SCHANCOVER

- Produced individual after task.
- Delivered and mounted.
- Can be delivered gastight.
- 5 years factory guarantee.

environmentally alternative

BIOGAS

We are also in a position to deliver Biogas storage tanks, produced in materials which is air-tight and resistant to micro-organism.

SCHANCOVER - Gate

With more than 15 years knowledge on materials and welding technique, can we at SCHANFLEX promise you, that a SCHANCOVER matches all existens covers on the marked.

SCHANCOVER is delivered with a unique type of Gate, that exclude allready known problems from gates on other covers.

✍ The Gatesystem requires no risky and difficult climb on to the cover, because with help from a uniq rollsystem, you can stand next to the tank and open the gate.

✍ Contemporary the gate is hold, so that it at no time can drop down into the tank.
All tension grip for cords are in stainless steel.

SCHANCOVER can be delivered with different accessories, for example a special SCHANFLEX-lead-in for different pipes.
These can of course be made conic and gastight.

SCHANCOVER-Gate
Can be produced and mounted on cover
from other suppliers.

Technical specification

COVER

Polyester 1100 d TEX

Weight 1100 g/m²

Ultimate stress 4400/3800 N/5 cm

Temperature - 40 °C / + 80 °C

Resistant against
ammonia- og biogas

General

SCHANCOVER is approved by

Research Centre Bygholm

(journal nr. 2002-64-261)

And are produced in agreement
With all current environment- and
building codes requirement.

SCHANCOVER-gate is

special developed by

SCHANFLEX.
